

3000%!!

MARCH 2010

The President spoke in front of a massive crowd of 200 people in Strongsville, Ohio where he preached about the super-cool magic of his health care bill...

“How many people out here get insurance through their employer? A lot of those folks...your employer, it is estimated would see premiums fall by as much as 3000%. Which means they could give you a raise.”

3000%!! Cool man, Obama rules! That means if I pay \$4000 a year in health benefits per employee I will be getting back \$120,000!

$\$4000 * 3000\% = \$120,000$

Not only could I give some raises, but with all that money I could buy a whole unicorn ranch as well!
